

FAQ-登入公文系統或 IC 卡元件自我檢測時網頁出現 -localhost 無法連線

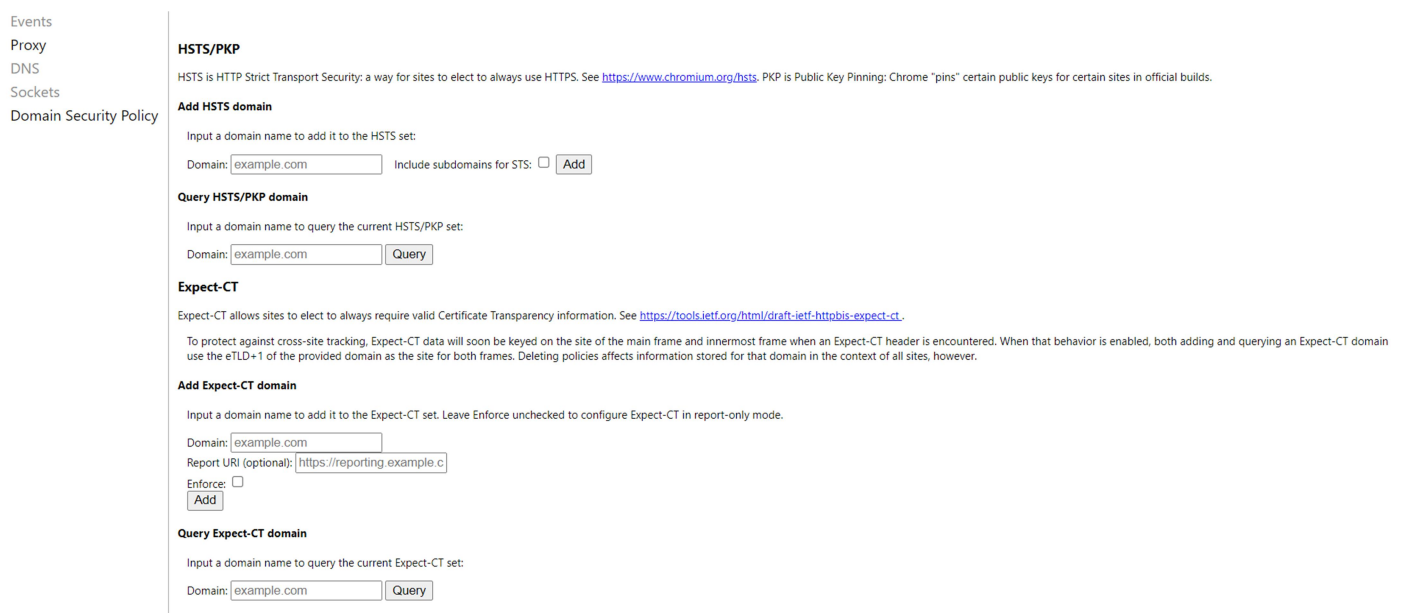

問題描述：

使用者使用自然人憑證登入系統或使用跨平台網頁元件進行 IC 卡元件自我檢測功能時，網頁出現”localhost”無法連線等相關錯誤畫面。

解決方法：

- 1.關閉所有 Chrome 網頁程式。(若使用 edge 瀏覽器請將所有步驟之 chrome 改為 edge 即可)
- 2.重新開啟 Chrome，於網址輸入 **chrome://net-internals/#hsts**，至 hsts 設定網頁。

3. 拉到網頁最底部, Delete domain security policies 項目。

To protect against cross-site tracking, Expect-CT data will soon be keyed on the site of the main frame and innermost frame when an Expect-CT header is encountered. When that behavior is enabled, both adding and querying an Expect-CT domain use the eTLD+1 of the provided domain as the site for both frames. Deleting policies affects information stored for that domain in the context of all sites, however.

Add Expect-CT domain

Input a domain name to add it to the Expect-CT set. Leave Enforce unchecked to configure Expect-CT in report-only mode.

Domain:

Report URI (optional):

Enforce: ☐

Query Expect-CT domain

Input a domain name to query the current Expect-CT set:

Domain:

Send test Expect-CT report

Trigger a test report to the given report URI. The report will contain a hostname of "expect-ct-report.test" and dummy data in other fields.

Report URI:

Delete domain security policies

Input a domain name to delete its dynamic domain security policies (HSTS and Expect-CT). (You cannot delete preloaded entries.):

Domain:

4. 於 Domain 欄位輸入'localhost'後按右方[Delete]按鈕刪除設定, 完成後關閉此網頁即可排除問題。

Delete domain security policies

Input a domain name to delete its dynamic domain security policies (HSTS and Expect-CT). (You cannot delete preloaded entries.):

Domain:
